# No.557 Friction Tester, model AN

*Inclined plane method*

## ■ APPLICATION

This instrument measures coefficient of static friction of plastic and paper etc. conforming to JIS P 8147.

The sample is placed on inclined plane, gradually increasing the angle of inclination determining the angle at which the sled starts moving. Friction Tester AN incorporates a servomotor to stabilize inclination speed and the angle at which sliding begins and coefficient of static friction  $\mu_s$  ( $\tan\theta$ ) are digitally displayed.
