

No. 245 Compression Set Apparatus (Constant deflection)

APPLICATION

This equipment is used for measuring permanent strain. Materials like rubber, etc. are subjected to a constant strain and kept in this state in a high temperature. After releasing the strain, recovery factor is measured.

MODELS

	Model	Testing Standard
For JIS	N-J	JIS K 6262, ISO 815
For JIS/ASTM	ON-J	JIS K 6262, ISO 815, ASTM D 395
For ASTM		ASTM D 395

SPECIFICATIONS

Specimen size	Diameter: 29mm Thickness: 12.5mm Spacer: 9.35mm
Dimensions	W184 x D100 x H110mm
Net weight	Approx. 11kg
